

# Aaron Norman

## Project Coordinator

### BIO

Starting his career as a rod/instrument man for a small surveying company in 1999, Aaron worked closely with engineers and other surveyors while learning the basics of surveying. After moving to a large engineering firm later that year, Aaron took on the responsibility of leading a survey crew on design topos and construction layout.

In 2002, he moved to a well established surveying company in Independence, Missouri. While working closely with several professional land surveyors, he gained valuable experience on numerous boundary and ALTA surveys. He also took on a number of drafting projects and continued to lead a field crew.

Over ten years in the surveying business has given Aaron the opportunity to be involved in projects such as large topographic and design surveys, ALTA and boundary surveys, airport improvements, extensive utility and right-of-way surveys, subdivision development, high-rise building construction and DOT work.

As a project coordinator at Powell and Associates, Aaron strives to provide clients with fair and competitive bid pricing. His other responsibilities include project coordinating and drafting.

### PROJECT EXPERIENCE

#### City of Independence, Missouri Water Department

Managed field operations on several design/build projects. These projects included the design survey and construction layout for a new twelve inch water main along Vandyke Road and Burgess Road, as well as a new eight inch water main along Old Lexington Road and US 24 Highway.

#### KCI Consolidated Car Rental Facility

Managed field operations for the first consolidated rental car facility complex in the Kansas City area. This project consisted of construction layout for a 152,000-square-foot main terminal building, seventy acres of parking, ten individual rental car service centers and both on-site and off-site utilities.

#### UMKC Health Sciences Building

Managed field operations for a \$67 million, 225,000 square foot high-rise structure, providing structural, utility and parking layout. This Cornerstone Award winning project houses classrooms, research labs and office space for the UMKC School of Nursing and Pharmacy.

### WORK EXPERIENCE

2008 to Present Powell and Associates, LLC  
Project Coordinator

2006-2008 Borden Surveying, LLC  
Crew Chief

2002-2006 Harvey Jones Engineering  
Crew Chief

### EDUCATION

Metropolitan Community College  
General Studies

### AFFILIATIONS

Missouri Society of Professional Surveyors

Kansas City Metro Surveyors Association
